HERBICIDE	TISE	NOTI	FICAT	TON
-----------	------	------	-------	-----

NEW HAMPSHIRE ELECTRIC CO-OP (NHEC) intends to apply herbicides along various power-line rights-of-way during 2023. The following herbicides: Escort XP (Metsulfuron Methyl), Garlon 4 Ultra (Triclopyr), Krenite S (Fosamine Ammonium), On Deck (Dicamba and 2,4-D) and Clash (Dicamba) may be used for treatment. Treatments are scheduled to commence on or about the 1st of July 2023. The following lines, taps and their respective municipalities are scheduled for treatment:

NHEC lines can be identified by a metal tag attached to the pole with the following letter initials "NHE CO-OP" followed by a line identification number and a pole number usually immediately under the co-op label.

In accordance with the N.H. Division of Pesticide Control Regulations, individual landowners whose receive individual notification, fill out the attached Notification Request Coupon and return to the address as indicated below no later than JUNE 1st, 2023. Requests received after this date will not be considered for this treatment cycle.

In addition to the written notification, individual landowners whose property abuts or over whose property the right-of-way passes, have the right to request and receive the approximate date, (within 5 days before or 5 days after the act ualdate of application) that herbicides will be or have been applied in your area.

Further information may be requested by contacting: VCS (Consultant to NHEC) Michael Couture, Project Manager - 2342 Main Street, Athol, MA 01331, Telephone 603-325-3227.

not be granted until next treatment cylce.

to Homeowners Along Electric **Distribution Rights of Way**

New Hampshire Electric Co-op (NHEC) has contracted with Vegetation Control Service, Inc. (VCS) to conduct an Herbicide Application Program on or adjacent to your property. VCS is an industry leader with 40 years of herbicide application experience in right of way maintenance programs. This herbicide application will be part of NHEC's Integrated Vegetation Management Program (IVMP). A selective herbicide application will be used to control regrowth of hardwood stump sprouts from recent cutting trimming or mowing operations on the distribution system. This is very essential to provide safe and reliable electric delivery. This selective herbicide application prevents undesirable, tall growing tree species from growing up into the conductors. It also establishes a low growing, stable plant community that allows crews working to maintain or restore power, access to the lines.

If you have any concerns about this application please contact VCS within 14 days of the date on reverse side.
